

Energy from Glass

Our solution

Generate electricity from almost **every glass surface** you can imagine...

- Facades
- Windows
- Balconies
- anti-noise barriers
- Fences
- Verandas
- bus shelters
- etc...

Different & complementary uses...

Energy

focus on **electricity generation only**,
mainly **on roofs** and **solar farms**

Esthetics and Energy

colors, transparency, design
and **electricity generation**

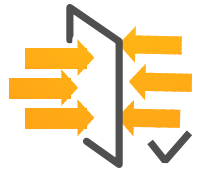

glass2energy modules are 10x different...

efficient under low light
and diffuse light

every orientation
every angle

efficient from both
sides

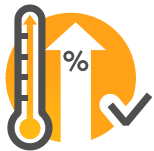

transparent

efficient in interior

colored

efficiency improves
with temperatures

100% glass
structure

low sensitivity to
shadows

easy to recycle
no rare earth
no toxic material
